***Terminal Disclaimer***

1. The terminal disclaimer filed on 11/04/2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,697,683 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Reasons for Allowance***

2. Claims 5-14 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Prior art Tissue (Patent No. 5,450,202) discloses an adaptive resonant positioner for a resonant load to sense actual positions of a resonantly movable optical reflector and to successively reposition an optical reflector to steer a light beam in desired directions in order to provides an improved tunable laser. Tissue taken either alone or in combination <sup>does not</sup> disclose an agile positioner responsive to an actual position of a substantially non-resonant load having all the claimed features of applicant's instant invention, specifically including: open loop sequence computation means responsive to a desired position and to the actual signal for determining differences between desired and actual positions of the load at one of a plurality of positioner cycles for each desired position, correction calculating means responsive to the differences for calculating and outputting open loop sequences computed for a boundary state of velocity and position error at an end of the positioner cycle whereby the load moves closer to the desired position and with substantially zero velocity at the end of each positioner cycle; and other limitations related to these features in combination with the remaining elements and features of the claimed invention. Therefore, the claim invention improves the entire adaptive positioner and

overcome from the open loop sequence computation mean. It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
